---	--

- Each Natural program will have a maximum number of head allowed per week. Therefore, cattle should be consigned to USPB *far in advance* to ensure program availability. Advance notice will also allow adequate time for initial feedyard approval.
- Feedlots must first be approved by National Beef before cattle can be consigned to either program. Natural grid cattle should be delivered in load lots. Feedyard approval is at the sole discretion of National Beef based on geography and annual marketing potential of natural cattle.
- Other pricing options may be available as conditions warrant.
- Contact USPB at 866-877-2525 for more detailed information regarding NatureSource™ or Naturewell™.
